These recoveries also enable the Bank to further expand its secured advances portfolio by utilizing these recovered funds.

❖ Reducing Cost of Deposits

Due to reduction in policy rate by Government, the cost of deposit (COD) of the Bank has been reduced, however, its impact will be reflected in future periods. The management is also proactively implementing strategies to attract a higher volume of corporate customer deposits into current accounts, offering competitive incentives and introducing innovative products. This approach is expected to yield a significant increase in current accounts in future and hence, reduction a further reduction in the cost of deposits, leading to a positive impact on the Bank's overall financial performance and profitability.

❖ Optimization of Operations and Reduction of Costs

The Bank is implementing strategic measures to optimize its branch operations, including the closure of non-productive and non-strategic branches, to effectively control costs. These initiatives are expected to have a positive impact on the Bank's financial performance, enhancing its overall profitability.
